ACKNOWLEDGEMENT

Praise be to Allah, the Almighty God, the Most Merciful and the Most Beneficent, for blessing me with His mercy and guidance to finish this thesis. The peace is upon to our prophet Muhammad SAW, as well as his family and followers. This thesis entitled *"The Correlation Between Skimming Skill And Students' Reading Comprehension At The Eleventh Grade of SMKN 2 Kotabumi Academic year 2020/2021"* is submitted as a compulsory fulfillment of the requirements for S1 degree of English Study Program at Teacher Training Faculty, University of Muhammadiyah Kotabumi (UMKO).

When finishing this research paper, the researcher has obtained so much help, assistance, aid, support and many valuable things from various sides. Therefore, the researcher would sincerely thank to:

1. The Rector of University of Muhammadiyah Kotabumi, Dr. Sumarno, M.Pd.
2. Both of the advisors, Dr. Badawi, S.H.,M.Pd., the first advisor Elis Susanti, S.Pd.,M.Pd as second advisor.
3. The lecturers and staffs in University of Muhammadiyah Kotabumi.
4. The head master, all teachers, staffs and the students of of SMKN 2 Kotabumi.
5. Everybody who cannot be mentioned one by one.

Furthermore, the researcher expects that the thesis is useful for the researcher particularly and the readers generally, especially for those who are involved in English teaching profession.

ABSTRACT

Reading comprehension is one of the main skills in learning English, reading can also be a factor of student success in the learning process. And speed reading is a skill to identify main ideas in a text without reading the entire text. Students still tend to have difficulty reading, therefore, the purpose of this study is to find out whether there is a relationship between students 'speed reading abilities and students' reading comprehension in grade XI SMK N 2 Kotabumi in the 2020/2021 student year. The population of this study were XI grade students of SMK N 2 Kotabumi North Lampung in the students' year 2020/2021. This research is a quantitative descriptive study that is interactive. The study population consisted of 379 students. This research applies proportional random sampling technique to determine the research sample. The sample was taken 10% of the population from each class, which amounted to XI classes, so the total sample was 38 students from each class. Then, the study gave students a reading comprehension test in the form of multiple choices with a total of 20 test items tested in terms of validity and reliability. Then the students' speed reading ability in the form of a questionnaire was the total item with the questions 10. The result of $R_{observed}$ was 0.364 and R_{table} was 0.329. It shows that $R_{observed}$ significance test to get the final result found that $T_{observed}$ was 1.002, then T_{table} was 0.684. It indicated that $T_{observed}$ was greather than T*table*. So, it can be concluded that there is a relationship between the ability to read quickly and the reading comprehension of students in the eleventh grade of SMKN 2 Kotabumi Noth Lampung Academic Year 2020/2021.

ACKNOWLEDGEMENT

Praise be to Allah, the Almighty God, the Most Merciful and the Most Beneficent, for blessing me with His mercy and guidance to finish this thesis.
